

Jorge A. Lopez

RESEARCH

Dr. Lopez has performed research on nuclear physics, gravity waves, astrophysics, physics education, pre-K science teaching, materials science, and applications of scientific methods to social sciences including political science, anthropology and cultural heritage. Has had collaborations with researchers in Berkeley, CA, Buenos Aires and several institutions in Mexico. Has edited and written books and journal articles on research topics, has obtained funds for research activities, and organized regional, national and international meetings. In particular, he played a key role initiating the Latin American Symposium on Nuclear Physics and Applications, and in founding the Division of Radiation Physics of the Mexican Society of Physics.

SYNERGISTIC ACTIVITIES

- Reconstruction of the materials characterization laboratory. Project funded by The Department of Defense to refurbish surface physics research equipment such as Auger/XPS/SIMS spectroscopy PHI 560 ESCA/SAM Perkin Elmers; to date seven MS students have graduated with research based on such equipment.
- Latin American Symposium on Nuclear Physics and Applications. Invited by Dr. Laszlo Sajo Bohus (Universidad Simon Bolivar, Caracas, Venezuela) in 1995, Dr. Lopez participated in the creation and strengthening of the Symposium. Now in its 9th edition, the Symposium has been held in Venezuela, Colombia, Mexico, Brazil, Argentina, Peru, Chile and – in 2011— in Ecuador.
- Division of Radiation Physics of the Mexican Society of Physics. Invited by Drs. Efrain Chavez and Guillermo Espinosa (Universidad Nacional Autonoma de Mexico) in 2003, Dr. Lopez participated in the creation and strengthening of the Division. Now in its 8th year, the Division has organized meetings in Mexico City (twice), Chihuahua, Villa Hermosa, Zacatecas, and – in 2011—in Cuernavaca.
- Donation of research equipment. Thanks to direct intervention of Dr. Lopez, 1) valuable pieces of an accelerator were donated by Oak Ridge National Lab to Mexico's Instituto Nacional de Investigaciones Nucleares, 2) an electron accelerator was donated by Texas Christian University to New Mexico State University, and 3) a proton accelerator was donated by Sandia National Lab to New Mexico State University.
